Potential LEED Points

Integrative Process (Possible 2 points)

To support high-performance, cost-effective project outcomes through on early analysis of the interrelationships among systems.

Koncept's LED desktop and task lighting provides finer control over lighting levels in occupied spaces. With personal lighting in place, elimination or downsizing of building lighting systems is possible.

Interior lighting (Possible 2 points)

To promote occupants' productivity, comfort and well-being by providing high-quality fighting.

Koncept's portable task lighting products provide more than three lighting levels that occupants can easily adjust to suit their needs. Users can achieve dimming control for most hardwire lighting products by implementing standard ELV dimmers. Furthermore, all Koncept lighting products use high quality LED light sources with CRI over 80 (over 90 for hardwire products) and L70-rated lifespan over 50,000 hours. Desktop and task personal lighting also provide the opportunity to reduce overhead lighting.
